"Is the glass half empty or half full?" is a common expression, a proverbial phrase, generally used rhetorically to indicate that a particular situation could be a cause for Pessimism (half empty) or Optimism (half full), or as a general litmus test to simply determine an individual's worldview. The purpose of the question is to demonstrate that the situation may be seen in different ways ...

Is the glass half empty or half full? - Wikipedia

Glass syringes intended to deliver drugs or biologics to a patient are a critical aspect of patient care. Typically, glass syringes are intended to connect to other devices such as

The alcohol thermometer or spirit thermometer is an alternative to the mercury-in-glass thermometer and has similar functions. Unlike the mercury-in-glass thermometer, the contents of an alcohol thermometer are less toxic and will evaporate quickly. The ethanol version is the most widely used due to the low cost and relatively low hazard posed by the liquid in case of breakage.
