On the Influence of Carbonic Acid in the Air upon the

A Report on Early Experiences “ 1 SECTION ONE of the paper begins with a review of the role of the Aspen Institute Roundtable on Community Change (Roundtable)2 in developing training and research around the TOC approach to planning and evaluation.

OCTOBER - Theory of change

Many vehicles have a design that makes use of the wing in ground effect. Although all airplanes fly through ground effect at some point, craft that do so in a dedicated manner are designed in such a way that their wings are normally unable to take them into flight out of ground effect (free flight).

RESEARCH REPORT 432 - Health and Safety Executive

Risk compensation is a theory which suggests that people typically adjust their behavior in response to the perceived level of risk, becoming more careful where they sense greater risk and less careful if they feel more protected. Although usually small in comparison to the fundamental benefits of safety interventions, it may result in a lower net benefit than expected.

CIVIL WAR:. In "Democracy after Civil War: A Kantian Paradox," New York University, November 16, 2002, Leonard Wantchekon presents a theory of "post-civil war democratization" which draws upon the model of political order among rational demons as well as sources from "classical political theory, contemporary democratic theory, and the state-building literature."

1. Introduction. Advanced energy storage devices are playing an increasingly important role in modern society, including portable devices, electric vehicles, and large-scale smart grids , , . Among various energy storage technologies, lithium-ion batteries (LIBs), which were launched in 1991 by Sony Corporation, currently outperform other systems and are dominating the battery market with a ...

1. Introduction. Globally, ground vehicle electrification is becoming ever more popular, due to several unprecedented CO₂ abatement goals set for the transport sector. In regard to the comparably short range and high cost of battery electric vehicles (BEVs), partially electrified vehicles, namely hybrid electric vehicles (HEVs) and plug-in HEVs, seem more feasible and practical in the short-term.
